# **Professional Experience and Projects:**

# Access Consulting (Pvt) ltd.

**Functional Consultant** 

**Project Title:** Collection Management System - CMS **Client:** Silkbank, Dubai Islamic Bank, Bank Al-Habib

Team Size: 12

**Description:** The aim of collection System is to return accounts to a position of financial health. This is carried out via a customer paying the arrears amount within the shortest possible timeframe commensurate with their ability to pay and remain in order. Throughout the whole collection cycle, the focus is on rehabilitation of the borrower and minimizing actual losses. The collection phase of the credit cycle covers accounts that have failed to make one or more contractual payments, i-e they have

become delinquent and are in default of their contractual obligations to repay. The collection phase also covers pre-delinquent accounts under pre-emptive strategy with an objective to reduce the flow of accounts into delinquent buckets.

#### Responsibility:

- Requirement gathering and meeting with CMS stake holders.
- Responsible to cater the scope lock of the project with efficient and quick timeframe delivery.
- Ensure that development standards, policies and procedures are adhered to.
- Managing the Risk, Issue logs of the projects.
- Managing Onsite/Offsite development resources, QA resources.
- Monitoring & controlling the project so that they can be delivered on time.
- System analysis, designing, development, Implementation and deployment of application architecture, DB Schema, reports, and implementing and assuring best design patterns at every layer.
- Responsible for the migration of the data from the host system like (T24, Card Pro, iFlex and CAMS) into CMS with accurate facts and figures.
- Responsible for the deployment of multiple patches against the issues and new requirements as well.
- Implement and modifications of various systems due to Change Requests and Problem Fixes, and enhance the system.
- Responsible to perform DB backup and ETL execution on daily basis. Reducing deadlock is a main task while executing ETL process jobs on different timeframe.
- Planning and Executing Project Roll-out, UAT, GO LIVE phases.

#### Platforms, Tools & Framework:

.Net Framework 4.0,C#,ASP.NET,HTML/CSS,XML,Ajax,JQuery,JSON,Visual Studio 2012,SQL Server 2012 R2 Standard, Web Services, Business Intelligence Tools and Techniques (Integration Services, Reporting Services),Team Foundation Server, SAP Crystal Report latest version.
